

# ANDRE MOSELEY

Quality Engineer

## PROFILE

I am a quick learner & demonstrate the ability to overcome challenges for critical deliverable timelines in the software development lifecycle. My adaptability, dedication, empathy & enthusiasm are the key qualities that define me as a team player. My in-depth understanding of business products & technology contributes to my success as a FDM IT Consultant for my role as Quality Engineer at TD Canada Trust.

## EXPERIENCE

### Quality Engineer – FDM Group IT Consultant

TD Canada Trust - Canadian Personal Banking,  
Toronto, ON Jan 2019 – Present

- Solving vendor software environment issue before critical deadline during production acceptance testing for FundServ on Sales Investment Journey project.
- Reducing data preparation time with Excel macros by improving data management for customer reports.
- Leading & designing end to end test scenarios with maximum coverage for Cobol program implemented to filter customer performance data reported downstream.
- Ensuring accessibility of front-end mortgage application webpage & custom Salesforce queue management service using agile sprint methodology.
- Strategizing & executing an optimized test plan for banking application changes under Gender Identity Evolution Management project using my product knowledge & understanding of requirements.
- Reducing test execution time by building Java Selenium framework automation scripts for Cobol application testing of branch RSP & Term account transactions.
- Collaborating with IT support, developers & business analysts by testing new software versions.
